

Mitsubishi Hitachi Power Systems Canada, Ltd. (MHPSC) is a major supplier of custom welding, machining, assembly, and field services to the energy industry in Canada and around the world. We are currently seeking a **Project Engineer** to join our highly skilled team at our manufacturing plant in Saskatoon.

Type: Permanent, Full-Time
Position: Project Engineer
Department: Custom Machining
Reports to: Manager, Custom Machining

Responsibilities:

- Promote a safe working environment
- Responsible for executing Custom Machining projects per contract requirements including scope, quality, schedule, and cost
- Ensure projects are clearly defined for effective execution on the shop floor
- Provide regular project progress reporting to company and customer
- Responsible for customer single point of contact throughout the duration of the project build including meetings, communications, and change order management
- Responsible to identify and implement continuous improvement opportunities for project execution
- Work with support groups including shop floor leaders, QA, scheduling, and purchasing for improvement opportunities

Requirements:

- Demonstrated commitment to safety
- Bachelor's degree in Mechanical Engineering
- 4 – 8 years of experience in a manufacturing/machining environment
- Ability to communicate and negotiate with internal and external customers and suppliers
- Demonstrated ability to work effectively with people in different departments
- Demonstrated ability to provide leadership and manage projects
- Effective oral and written communication skills
- Ability to excel in a team environment
- Solid problem solving skills

We Offer:

- Competitive compensation
- Comprehensive benefits package
- Company-matched pension plan
- Paid wellness time which converts to vacation time if unused
- Education spending account
- Safety apparel allowance
- Social Club activities
- Community involvement initiatives
- Continuous training opportunities

MHPSC is a wholly-owned subsidiary of Mitsubishi Hitachi Power Systems, Ltd. We enjoy the benefits of being part of a large international corporation and the advantages of operating locally, with the chance to work on products that help generate energy locally and internationally.
